Algae Control Australia with WaterIQ Technologies™ Sustainable Algae & Biofilm Control

The Highest Precision Ultrasound Targeting for Algae and Biofilm Remediation and Prevention with 4400 Series

Pulsar4400

4400 frequencies target most green, blue-green and some golden and red algae. The 4400 provides the highest targeting precision for high value water resources

Pulsar3400

Designed for smaller applications with lower range for smaller bodies of water and enclosed applications -- but with the same high precision targeting of algae and biofilm as the 4400

Sustainable Algae Management - SAM

SentinelAIQ

Water Quality Platform

SenseIQ

Water Quality Probes

Pulsar3400

Pulsar4400

Ultrasonic System

Prevent - Combat - Sustain

WaterIQ Technologies™ is the leading supplier of solutions that prevent and combat algae using advanced ultrasonic technology, restoring water to its natural state quickly and sustainably without the use of harmful chemicals.

The Pulsar represents the next generation in ultrasonic defense systems designed for prevention, performance, and reliability. Our systems operate 24/7, provide high-reliability telemetry and cloud connectivity enables realtime monitoring of operational performance and water quality.

A-Frame Land Based Solar

Ideal power for smaller applications where local power is accessible

Land based AC/DC Powered

Shore based power supply for applications where AC power is available

Sentinal and Sentinal AIQ+

Used in large applications and where AC power is not available and cables are prohibitive

Pulsar Float System

The standard solution for land based systems – cable linked from the shore to the float

SenselQ

Available in a small format MiniSense and eight sensor SenselQ8 models. We are happy to discuss other options

Options and Configurations

	400	Pulsar 4400
Number of Frequencies	4400	4400
Number of Piezo Transducers/head	heads @ 90 degrees	heads @ 90 degrees
Algae targets (All units address biofilm)	Most cyanobacteria / blue green algae, biofilm + selective golden and red algae – For smaller area applications	Most cyanobacteria / blue green algae, biofilm + selective golden and red algae
Green Algae Target Range	Meters Radial (10 acres)	150M Radial (17 acres)
Blue Green Algae Target Range	200M Radial (60 acres)	400M Radial (120 acres)
Biofilm Target Range	45M	60M Radial (2.8 acres)
Power Options	120V/240V, 24V DC, Solar	120v/240v, 24vDC, Solar, Sentinel AIQ/+
Head Options	Single Unit or Dual Units to the same power supply	Single Unit or Dual Units to the same power supply
Anti Fouling – non mechanical	Y	Y
Clarifier Option for integrated Cable	Y	Y
Custom Cable lengths	Y	Y
Standard Monitoring/Telemetry including on/off, restart, reboot, sync and measurement of operational performance and water quality metrics at set intervals	Y	Y
Water Quality Monitoring – MiniSenseIQ – Chlorophyll A, Cyanobacteria, Temp – no calibration with wiper	N	Y
Water Quality Monitoring – SenselQ8 – Basic + OPR, Ph, Do, Turbidity	N	Y
Power Consumption	W total	W total
Connectors	IP69	IP69
IQCloud Integration and Access	Y	Y

Teton Pines -- Blue-Green Algae

Wilson Pond -- Spirogyra
